Second engine Event-Driven Index™

Index Overview

Event-driven strategies aim to capitalize on price inefficiencies resulting from events such as mergers and acquisitions, corporate restructuring, shareholder buybacks, financial distress, or other corporate events. The type of securities traded can range from the most senior in the corporate capital structure to common shares, and may involve additional derivative securities. Returns from event-driven strategies are typically idiosyncratic and less dependent on broad markets.

Objective

Establish an appropriate and representative baseline for measuring the performance of the liquid alternative strategies in Canada.

Key Features

- Designed to measure the performance of the liquid alternative universe that is increasingly popular, but difficult to track
- Constituents comprised of NI 81-102 alternative mutual funds
- Consists of 1) an overall index, 2) seven strategy-based indices, and 3) three goal-based indices
